

Amanda Project – Case Study

Client Website Development

Overview Developed a professional website for a real client focused on mental health and therapy services. The goal was to create a clean, accessible, and user-friendly platform that clearly communicates services and builds trust with potential clients.

Objective

- Present therapy services clearly
- Build credibility and trust
- Ensure easy navigation
- Provide a responsive experience across devices

My Role

- Designed and developed the website from scratch
- Implemented responsive UI for mobile and desktop
- Structured content for readability and user flow
- Optimized layout for performance and accessibility

Technologies Used

HTML	CSS	JavaScript	Responsive Design
------	-----	------------	-------------------

Key Features

- Clean and minimal user interface
- Fully responsive design
- Structured content layout
- Smooth navigation and UX

Challenges & Solutions

Challenge: Presenting professional content in an approachable way

Solution: Focused on clean design, spacing, and readability

Challenge: Ensuring cross-device compatibility

Solution: Implemented responsive design and testing

Results

- Delivered a functional and visually appealing website

- Improved user experience and clarity
- Established a professional online presence for the client
